

At Hugh Symons Audio Visual, we have the expertise to help you choose the best solution to meet your AV requirements - and to deliver it with our trademark fast, friendly and reliable service. Some of our customer successes:

The Challenge

- Efficient communications are vital to success in any organisation, but for an emergency service like the RNLI it can mean the difference between life and death.
- Multiple Sites requiring overseeing of infrastructure and quick targeting of issues.

The Solution

Hugh Symons supplied and installed a wall-mounted screen array system to help the RNLI team monitor issues: "This type of equipment is so valuable to us in RNLI's IT sector because it helps us to keep ahead of technical issues, whether it's a particular e-mail box or internet problem somewhere around the country or an issue with equipment or supply.

"It's also helpful that Hugh Symons are on hand for us and we've always found their installation technicians helpful and efficient."

Since 2013 Hugh Symons has supplied a range of 40/42 and 49 inch screens and touch screens as well as large ceiling projectors to lecture rooms and marketing suites.

The Solution

Hugh Symons AV supplied and installed a Clevertouch Pro interactive 4k screen: drawings could be viewed clearly and easily within the meeting room, with immediate wireless connectivity from laptops, smartphones and tablets to share screens for project management and to review survey photos. The screen itself required no set-up or calibration, was immediately connected to give full access to the internet and was able to display a variety of files without the need to connect additional hardware.

Using the Montage feature in meetings allows GAP Ltd to have four key contributors and decision makers fully participating. All attendees can now stream whatever is on their devices to the main display at the same time and without the need to struggle with cables.

The Challenge

- Multiple engineers unable to collaborate remotely, with in-house meetings hosted on laptop screens.
- Meetings with hand-written notes, proving time consuming and making communication about projects challenging.
