

At Hugh Symons Audio Visual, we have the expertise to help you choose the best solution to meet your AV requirements - and to deliver it with our trademark fast, friendly and reliable service. Some of our customer successes:

The Challenge

- Multi-academy trust with variation in quality of ageing hardware and AV support levels across the trust's sites.
- Three sites - Ocean Academy Poole, Jewell Academy Bournemouth & Magna Academy Poole – requiring digital signage for reception areas.

The Solution

- LG display screens were supplied for the reception areas of all three sites – Onelan signage boxes with software allow the trust to easily control the content on each screen from a single site.
- Hugh Symons have supplied multiple AAT sites with SMART interactive touch screens as replacements for existing projector and whiteboard setups, giving an up-to-date teaching experience with lower ongoing costs.
- Working with Hugh Symons AV has given a level of consistency for the schools' support team.

The Solution

- Hugh Symons AV have supplied the school since 2010, and they were one of the first to embrace Casio LED projectors with their 5-year warranty. These lampless units are still 'going strong', retaining their brightness and saving on lamp costs.
- The school realised the great value in the HP 'Pre-Loved' PCs supplied by Hugh Symons. Ex-Lease models with Intel processors and high spec, these have all the benefits of HP units with 3 Years full warranty at a fraction of the original price.

The Challenge

- Ongoing cost of projector lamps can escalate, particularly over a larger site with a number of classrooms needing replacement.
- Likewise, replacing PCs with the higher spec now expected by staff can prove expensive.
